

ATT: AFP, CRIMINAL INVESTIGATION, REGARDING FRAUDULENT CONDUCT

M Despott, Concerns regarding criminal conduct, Mar 8th 2024

Dear Australian Federal Police,

We hereby request that you run a full and thorough investigation into the fraudulent and criminal conduct, including the Prosecution, Magistrates court, Queensland police, Legal Aid and all associated administration within the Department of Justice and any associated affiliations thereof.

The aforementioned is the primary focus and concern, the secondary focus is the involvement of several council shires, including Townsville, Cairns and Port Douglas, namely that of criminal activities and the possible employ of members of the community in the conducting thereof.

The main points of conjecture, which we wish to highlight in this report, are the following:

- Abduction (false arrest)
- Illegal detainment
- Harassment and intimidation
- Assault
- Extortion
- Acts of terrorism

Further to this, are the concerns regarding the administrative actions of the aforementioned parties, it is alleged that they have formed, and/or aligned, in a coordinated effort, in an attempt to have our client permanently displaced and even incarcerated, of what is suspected to be an indefinite period.

The matters highlighting in this report have already been previously raised with all associated regulatory and investigated bodies, including but not limited to, the Police Ethics Committee, Crime and Corruption Commission and even the Attorney General.

Not only have these organisations to date failed act, they have not even performed their basic due diligence, nor acted in accordance with their basic obligations, being that of a government entity and body, suffice to say, that of public servants, further still that of even basic courtesy.

Note, there has been extensive and exhaustive communications with all parties, and we are of the strong conclusion, based on their inaction, that they are not only complicit in attending to the aforementioned breaches, by pure nature of their virtue, and an absence and failure to perform their assigned duties, combined with the nature of their communications and lack their of to date, potentially deems them an accessory to the aforementioned crimes.

We hereby put forward to your administration, that given that these bodies are in fact going about certain criminal practices, and a considerable proportion of these being financial in nature, including but not limited to misappropriation of resources, collection of monies and also claims for services that have not in fact been rendered, and/or that have been collected under false pretences, that this constitutes an act of defrauding the Commonwealth, and at the very least, we ask that this component be investigated, given that it falls under your jurisdiction.

Kind Regards,

Guardian
(On behalf of Michael Despott)
